PROFESSIONAL SUMMARY

Senior Software Engineer with 4+ years of experience designing and building highly scalable systems, distributed services, RESTful APIs, and AI applications. Strong expertise in TypeScript, JavaScript, React.js, Node.js, microservices, asynchronous processing, AWS, relational databases, system design, observability, and production reliability. Experienced in designing performant backend architectures, authentication, and enterprise SaaS platforms, with additional expertise in production AI systems including RAG, agentic workflows, tool orchestration, and LLM API integrations. Proven experience leading engineering initiatives, mentoring engineers, and delivering reliable production systems in collaboration with engineering, product, and client stakeholders.

SKILLS

Languages: C/C++, JavaScript/TypeScript, SQL

Development: React.js, Next.js, Node.js, Express.js, Redux, TailwindCSS, Postman, RESTful APIs, gRPC, WebSocket, API Gateway, Microservices, Axios, Chai, Mocha, Sinon, Problem-solving, Debugging, and Analytical

Distributed Systems: Distributed Systems, Asynchronous Processing, Pub/Sub, Queues, System Design

Databases: MySQL, MongoDB, PostgreSQL, Redis, Pinecone (Vector Database)

DevOps: AWS, Docker, Kubernetes, Terraform, CI/CD, Git & GitHub, GitHub Workflows, Load Balancer, RabbitMQ, Datadog

Security: OAuth, Authentication, Authorization, 2FA Auth

AI Technologies & Tools: RAG, LangChain, MCP, Tool calling, Multi-step workflow, Integrate LLM APIs, AI Specialized Engineer, Agentic Engineer, Context Management & Prompting

EXPERIENCE

WelcomeScreen

Senior Software Engineer

Sep 2023 – Present

San Francisco, USA

- **Founding Engineer** that contributed to company growth from **\$0 to \$300K ARR** within the first year by rapidly building and scaling core platform features.
- Supervised, managed, and led a team of **8 peers** in the development of a robust upgrade for the existing software application, resulting in **40% incremental revenue** in 6 months.
- Mentored and solved complex technological issues for a variety of assigned projects, achieving over **97% customer satisfaction** and reducing latency by **40–50%**.
- Led and mentored a team of **5+ engineers** to successfully launch a scalable e-commerce platform with seamless **Stripe integration**, improving payment reliability, accelerating the checkout experience, and driving business growth.
- Re-architected the entire system from monolithic into a scalable **distributed microservices architecture**, improving scalability, reliability, and fault tolerance, while enabling faster deployments and cleaner, maintainable codebases.
- Optimized business logic and enhanced application performance through **caching, lazy loading, code splitting, tree shaking, Webpack optimization**, and advanced debugging, reducing customer churn and increasing revenue by **30%**.
- Architected and deployed an AI-driven guest support chatbot using **RAG (Retrieval-Augmented Generation)** and **ChatGPT**, integrating enterprise knowledge sources to automate query resolution and enhance customer experience.
- Designed and implemented a scalable **SaaS application** for hosts to integrate the Property Management System (PMS), manage and customize WelcomeScreen TV app content and templates, digital guidebook, guest reservations, and inbox.
- Determined areas of improvement by regularly monitoring existing business systems, fixing bugs, and boosting business efficiency by **25%** through automation of repetitive tasks.
- Designed and implemented a scalable **subscription and billing system** using Stripe, including an admin panel for custom subscriptions with free trials, recurring billing, metered pricing, upgrades/downgrades, and discounts.
- Designed and developed a scalable **Role-Based Access Control (RBAC)** system for secure authentication, authorization, and multi-level permission management.

AICAN

July 2023 – Sept 2023

Software Engineer

- Led end-to-end full-stack development of the **AICAN Admin Panel**, designing and implementing scalable frontend and backend solutions using the **MERN stack**.
- Architected and developed a role-based **Access Management System**, enabling secure user authentication, authorization, and permission control across the platform.
- Built **device management and customizable template modules**, allowing users to add, update, remove, and monitor PH Meters and Gelometers, while supporting dynamic widget ordering and personalized dashboard configurations using React.js and Tailwind CSS.

PAWPI

Jan 2023 – July 2023

Software Development Engineer

Jaipur, India

- Developed and deployed a scalable full-stack **pet e-commerce marketplace** (pawpi.co) using MongoDB, Express.js, React.js, and Node.js. Implemented responsive user interfaces, payment processing, shipping management, and cloud-based deployment on **AWS**, while automating releases through **CI/CD pipelines and GitHub Actions**.

SAASKART, BTH

Jun 2022 – Dec 2022

Software Developer Intern

Jaipur, India

- Engineered scalable frontend and backend solutions for a **SaaS platform** using React.js, Node.js, Express.js, and MongoDB. Designed and implemented secure authentication workflows (**Email OTP, Phone OTP, and Magic Link**), developed RESTful APIs, and created unit tests to improve application stability and maintainability.

EDUCATION

Poornima College of Engineering (RTU)

Aug 2020 – Jun 2024

Bachelor of Technology in Information Technology — CGPA: 9.5

Jaipur, India

EXTRACURRICULAR ACTIVITY

- Participation in **Invest Rajasthan STARTUP MEET**, BTH Jaipur.
- Participation in **Smart India Hackathon**.
- **#1 Rank** in CodeChef contest (Starters 41) and won a LinkedIn Premium subscription for 6 months.
- **3 stars** on LeetCode (@tara122333) with 6 badges (5 monthly and one 100 Days of Code 2022).
- Awarded a **Gold medal (#1 Rank)** by HackerRank in both C and C++ programming languages.
