SUMMARY

Senior Software Engineer with 4+ years designing scalable distributed systems, microservices, and production GenAI applications in TypeScript, Node.js, Python, FastAPI, React.js, AWS, and SQL/NoSQL databases. Hands-on with AI orchestration, RAG, agentic workflows (LangGraph, MCP, tool calling), and LLM integrations grounded in live production data. Built asynchronous backends serving 1M+ user requests at 99.9% availability. Strong in system design, observability, secure authentication, and payment systems. Proven experience leading engineering initiatives, mentoring engineers, and delivering reliable production systems in collaboration with engineering, product, and client stakeholders.

SKILLS

Languages: JavaScript, TypeScript, Python, SQL

Frontend: React.js, Next.js, AngularJS, Redux, TailwindCSS, HTML, CSS, Axios

Backend & APIs: FastAPI, Node.js, Express.js, RESTful APIs, GraphQL, gRPC, WebSocket, API Design, Microservices

Databases: PostgreSQL, MySQL, MongoDB, Redis, Pinecone (Vector Database)

Distributed Systems: Distributed Systems, Event-Driven Architecture, Asynchronous Processing, Pub/Sub, Queues, Workflow Orchestration, System Design

Cloud & DevOps: AWS, Docker, Kubernetes, Terraform, CI/CD, Git, GitHub, GitHub Actions, Load Balancers

Observability & Security: Datadog, Structured Logging, Monitoring, Alerting, OAuth, Authentication, 2FA

GenAI & LLM Systems: AI Orchestration, RAG, LangChain, MCP, Tool Calling, Multi-step Workflows, LLM API Integration, Agentic Engineering, Context Management, Prompt Engineering

Engineering: OOP, SOLID, Design Patterns, Git, Code Review, Technical Mentoring, Architecture Design, Testing

EXPERIENCE

WelcomeScreen Sep 2023 – Present
Senior Software Engineer *San Francisco, USA*

- Led a team of **8 engineers** through an end-to-end **platform modernization**, shipping a production-grade upgrade that drove **40% incremental revenue** in 6 months.
- Built a real-time **AI-powered hospitality platform** with **trip itinerary generation**, omnichannel **host–guest messaging**, and context-grounded **LLM auto-replies** on a **Postgres job queue** and **event-driven webhooks**.
- Architected an **evidence-driven AI troubleshooting platform** with **agentic workflows** (**FastAPI, LangGraph, MCP**, tool calling) grounded in **RAG**, live APIs, and **Datadog**, cutting manual triage for support and engineering.
- Designed **RAG pipelines** integrating document retrieval, **vector search**, contextual ranking, and **LLM generation**, improving **response grounding accuracy by 35%**.
- Designed and implemented **modular microservices** and **REST/GraphQL APIs** using **SOLID principles** and reusable service abstractions.
- Built a **reusable component library** of **250+ React components** and **200+ backend modules**, improving UI consistency and cutting feature development effort by ~**40%**.
- Designed scalable **asynchronous backend services** handling **1M+ requests**, optimizing throughput, responsiveness, and performance under high-concurrency workloads.
- Contributed to backend architecture and **reliability improvements** supporting **99.9% production availability** across critical services.
- Designed a **multi-tenant SaaS platform** integrating hosts' **Property Management Systems (PMS)** via third-party APIs to manage TV app content, templates, digital guidebooks, reservations, and a unified inbox.
- Architected a **subscription and billing system** on **Stripe** supporting free trials, recurring and **metered/usage-based pricing**, upgrades/downgrades, and discounts, with an admin panel for custom plans.
- Optimized **application performance** through **caching, lazy loading, code splitting, tree shaking, and Webpack bundle optimization**, reducing customer churn and increasing revenue by **30%**.
- Established centralized **monitoring, logging, alerting, and error-reporting** pipelines, reducing **mean time to resolution (MTTR) by 40%**.
- Mentored engineers and resolved complex **production issues** across multiple projects, sustaining over **97% customer satisfaction** while reducing latency by **40–50%**.

- Led **code reviews and technical mentoring**, promoting best practices for code quality, maintainability, testing, reliability, and production readiness.

AICAN Private Limited July 2023 – Sept 2023
Software Engineer *Mumbai, India*

- Designed and developed a scalable **Role-Based Access Control (RBAC)** system for secure authentication, authorization, and multi-level permission management.
- Developed **device management modules** to add, update, and monitor various devices, with **customizable dashboards** and dynamic widget.

PAWPI Jan 2023 – July 2023
Software Development Engineer *Jaipur, India*

- Integrated **payment processing** and **shipping management**, enabling end-to-end order fulfillment.
- Designed centralized **notification services** for real-time order and delivery status updates.
- Deployed to **AWS** with **CI/CD pipelines** and **GitHub Actions**, shortening release cycles.

Stack18 Jun 2022 – Dec 2022
Software Developer Intern *Jaipur, India*

- Implemented passwordless **authentication** (**Email OTP, Phone OTP, Magic Link**), improving security.
- Built responsive user interfaces and **RESTful APIs** for a **SaaS platform** using the **MERN stack**.
- Established **unit test coverage** with Mocha and Chai, reducing regressions and improving stability.

OPEN SOURCE

block-temp-mail — npm Package Dec 2025 – Present
TypeScript *Open*

- Authored and published a **zero-dependency TypeScript npm package** that detects and blocks **disposable/temporary email addresses** at signup — **1,500+ downloads**, **20 GitHub stars**.
- Prevents junk registrations at the source, curbing **free-trial abuse**, wasted email sends, and **infrastructure cost** while protecting **deliverability** and conversion metrics.

EDUCATION

Rajasthan Technical University (RTU) Aug 2020 – Jun 2024
Bachelor of Technology in Information Technology — CGPA: 9.5 *Jaipur, India*

EXTRACURRICULAR ACTIVITY

- **#1 Rank** in CodeChef contest (Starters 41) and won a LinkedIn Premium subscription for 6 months.
- **3 stars** on LeetCode (@tara122333) with 6 badges (5 monthly and one 100 Days of Code 2022).
- Awarded a **Gold medal (#1 Rank)** by HackerRank in both C and C++ programming languages.
- Participation in **Invest Rajasthan STARTUP MEET**, BTH Jaipur.
- Participation in **Smart India Hackathon**.
