## SUMMARY

Senior Software Engineer with 4+ years of experience designing and building highly scalable systems, distributed systems, microservices, RESTful APIs, and production AI applications. Strong expertise in TypeScript, JavaScript, React.js, Node.js, AWS, SQL/NoSQL databases, system design, and observability. Experienced in microservices architecture, performance optimization, secure authentication, subscription and payment systems. Hands-on experience with RAG, LangChain, MCP, tool calling, and LLM integrations. Proven ability to lead technical initiatives, mentor engineers, and deliver reliable, business-focused solutions.

## SKILLS

**Programming Languages:** JavaScript, TypeScript, Python, Java, C, C++, SQL

**Frontend:** React.js, Next.js, Redux, TailwindCSS, Axios

**Backend & APIs:** Node.js, Express.js, RESTful APIs, GraphQL, gRPC, WebSocket, API Design, Microservices

**Distributed Systems:** Distributed Systems, Asynchronous Processing, Pub/Sub, Queues, RabbitMQ, API Gateway, System Design

**Databases:** PostgreSQL, MySQL, MongoDB, Redis, Pinecone (Vector Database)

**Cloud & DevOps:** AWS, Docker, Kubernetes, Terraform, CI/CD, Git, GitHub, GitHub Actions, Load Balancers

**Observability & Reliability:** Datadog, Structured Logging, Monitoring, Alerting, Production Reliability

**Security:** OAuth, Authentication, Authorization, 2FA

**AI & LLM Engineering:** RAG, LangChain, MCP, Tool Calling, Multi-step Workflows, LLM API Integration, Agentic Engineering, Context Management, Prompt Engineering

**Engineering:** OOP, SOLID, Design Patterns, Git, Code Review, Technical Mentoring, Architecture Design, Testing, Debugging, Performance Optimization, Production Reliability

## EXPERIENCE

**WelcomeScreen** Sep 2023 – Present
*Senior Software Engineer* *San Francisco, USA*

- Led a team of **8 engineers** through an end-to-end **platform modernization**, shipping a production-grade upgrade that drove **40% incremental revenue** in 6 months.
- Re-architected a monolithic application into a **distributed microservices architecture**, improving **horizontal scalability, fault tolerance**, and release velocity through decoupled services.
- Built a **real-time AI-powered hospitality platform** with personalized trip itinerary generation, omnichannel **host–guest messaging** (SMS, WhatsApp, email), and context-grounded **LLM auto-replies**, backed by a durable **Postgres job queue** and **event-driven webhooks**.
- Architected and deployed an AI-powered guest support chatbot using **RAG (Retrieval-Augmented Generation)** and **LLM APIs** over enterprise knowledge sources, automating query resolution and elevating the customer experience.
- Designed scalable **asynchronous backend services** capable of handling tens of thousands of concurrent requests, improving system responsiveness and throughput.
- Contributed to backend architecture and **reliability improvements** supporting **99.9% production availability** across critical services.
- Designed and delivered a **multi-tenant SaaS platform** enabling hosts to integrate their **Property Management System (PMS)** via **third-party API integrations** and manage TV app content, templates, digital guidebooks, guest reservations, and a unified inbox.
- Architected a **subscription and billing system** on **Stripe** supporting free trials, recurring and **metered/usage-based pricing**, upgrades/downgrades, and discounts, with an admin panel for custom plans.
- Optimized **application performance** through **caching, lazy loading, code splitting, tree shaking, and Webpack bundle optimization**, reducing customer churn and increasing revenue by **30%**.
- Established centralized **monitoring, logging, alerting, and error-reporting** pipelines, reducing **mean time to resolution (MTTR) by 40%**.
- Led and mentored **5+ engineers** to launch a scalable **e-commerce platform** with **Stripe payment integration**, improving payment reliability and streamlining the checkout funnel to drive business growth.

- Mentored engineers and resolved complex **production issues** across multiple projects, sustaining over **97% customer satisfaction** while reducing latency by **40–50%**.
- Led **code reviews and technical mentoring**, promoting best practices for code quality, maintainability, testing, reliability, and production readiness.
- Drove **continuous improvement** by monitoring production systems, triaging defects, and automating repetitive workflows, boosting operational efficiency by **25%**.

**AICAN Private Limited** July 2023 – Sept 2023
*Software Engineer* *Mumbai, India*

- Designed and developed a scalable **Role-Based Access Control (RBAC)** system for secure authentication, authorization, and multi-level permission management.
- Developed **device management modules** to add, update, and monitor various devices, with **customizable dashboards** and dynamic widget.

**PAWPI** Jan 2023 – July 2023
*Software Development Engineer* *Jaipur, India*

- Integrated **payment processing** and **shipping management**, enabling end-to-end order fulfillment.
- Designed centralized **notification services** for real-time order and delivery status updates.
- Deployed to **AWS** with **CI/CD pipelines** and **GitHub Actions**, shortening release cycles.

**Stack18** Jun 2022 – Dec 2022
*Software Developer Intern* *Jaipur, India*

- Implemented passwordless **authentication** (**Email OTP, Phone OTP, Magic Link**), improving security.
- Built responsive user interfaces and **RESTful APIs** for a **SaaS platform** using the **MERN stack**.
- Established **unit test coverage** with Mocha and Chai, reducing regressions and improving stability.

## OPEN SOURCE

**block-temp-mail — npm Package** Dec 2025 – Present
*TypeScript* *Open*

- Authored and published a **zero-dependency TypeScript npm package** that detects and blocks **disposable/temporary email addresses** at signup — **1,500+ downloads**, **20 GitHub stars**.
- Prevents junk registrations at the source, curbing **free-trial abuse**, wasted email sends, and **infrastructure cost** while protecting **deliverability** and conversion metrics.

## EDUCATION

**Rajasthan Technical University (RTU)** Aug 2020 – Jun 2024
*Bachelor of Technology in Information Technology — CGPA: 9.5* *Jaipur, India*

## EXTRACURRICULAR ACTIVITY

- **#1 Rank** in CodeChef contest (Starters 41) and won a LinkedIn Premium subscription for 6 months.
- **3 stars** on LeetCode (@tara122333) with 6 badges (5 monthly and one 100 Days of Code 2022).
- Awarded a **Gold medal (#1 Rank)** by HackerRank in both C and C++ programming languages.
- Participation in **Invest Rajasthan STARTUP MEET**, BTH Jaipur.
- Participation in **Smart India Hackathon**.
